# THE GREAT REWILDING

## CREATE YOUR OWN BEE BATH

1 - Explore the great outdoors to collect some stones, pebbles & bright coloured flowers to decorate your bee bath. These will be used to attract the bees later on.

**TIP: When selecting your stones and pebbles make sure they are big enough to decorate!**

2 - Set up an area for arts & crafts with your brushes & paints. Make sure to place some newspaper down as it can get messy!

3 - Time to decorate! Paint your collected stones with lots of bright colours to attract the bees. Bees especially love purple and blue so be sure to include these in your designs! Leave your painted stones & pebbles to dry.

4 - Fill the bowl three-quarters full of water and place it in a sunny spot in your garden.

5 - Place the marbles and flowers into the water gently - they should float!  
This will provide a spot for the bees to rest when they come to visit.

6 - When your painted stones & pebbles have dried, place them around the bee bath.  
Be sure not to place any of the painted stones in the water!

**Watch your bee bath from a distance and see how many bees come to get water!  
To keep the bees coming back be sure to add fresh flowers after a few days.**
