HAPPY HALLOWEEN

HOW TO CARVE A PUMPKIN

STEP 1:

Cut a circle around the top of the pumpkin. Scoop out all the seeds inside and clean out the inside of the pumpkin.

STEP 2:

Draw your face or picture with a pencil.

TOP TIP: Make sure you don't make the teeth too thin. If you do, they will break off while cutting!

STEP 3:

Once you're happy with your face, draw over it in marker

STEP 4:

Begin carving/cutting out the shapes

Make sure your parents are with you for this as it can be really tricky. Sometimes it's best that they do the cutting and you direct them!

STEP 5:

Insert a candle or light into your pumpkin and see your creation light up.
